

## **PATHOLOGISTS SPECIALIZING IN PROSTATE CANCER**

Importance of Expert Pathology Opinion:

Despite the fact that the Gleason score might NOT change after an expert review, the reality is that more often it does. However, the issue is who did the first review. There are talented pathologists who are focused on prostate cancer and also two national labs who are focused on PC as well.

The Gleason score is a critical item; it is used as a variable in virtually every prognostic and treatment algorithm. An accurate GS mandates an expert pathology opinion from a PC pathology expert. The ones that I am most familiar with include:

A second opinion on the microscopic pathology is usually covered by insurance but if not, runs about \$500 pending on what is done. A copy of the original pathology report with the actual slides or recuts from the tissue block are sent to the outside reviewer. Your primary care doctor or you can initiate such a 2nd opinion but you need to request this and ask for a specific physician or lab to be used.

### **Bostwick Laboratories/ Pathologist David Bostwick**

**Virginia - Corporate Headquarters** 4355 Innslake Drive, Glen Allen, VA 23060

Phone: 1-877-865-3262

<https://www.bostwicklaboratories.com/>

(IMPORTANT: when samples are sent in, they should be accompanied by a request that ONLY Dr. Bostwick perform the review. He now has many associates and their expertise is unknown)

Jon Epstein (Hopkins) 410-955-5043 (Dr. Epstein does not do ploidy analysis)

<http://tinyurl.com/oha29qm>

**Kristin Galan, M.D.**, *Department of Pathology, Via Christi Clinic, PA, Founders' Circle 1947 Founders' Circle, Wichita, KS 67206, Telephone: 316-613-4627, Fax: 316-613-4628.* Dr. Galan does not consider herself a “specialist” regarding prostate cancer, however, she trained under Dr. Epstein and should she find anything unusual during a pathologic examination of the prostate gland, tissue samples, or associated organs, she consults with Dr. Epstein. With that awareness, I consider Dr. Galan reasonably qualified to include her in my listing.

Jon Oppenheimer, Owner and Chief Pathologist, Oppenheimer Urologic Reference Lab (OURLab), 1450 Elm Hill Pike, Nashville, Tennessee 37210, telephone 888-868-7522, Email: [JPathologist@gmail.com](mailto:JPathologist@gmail.com).

M. Scott Lucia, Director, Prostate Diagnostic Laboratory, Co-Director, Prostate Cancer Research Laboratories, University of Colorado, Denver – School of Medicine at Fitzsimons Dept. of Pathology, 303-724-3470 E-mail: [Scott.Lucia@uchsc.edu](mailto:Scott.Lucia@uchsc.edu)

Western Australia: Ronald J. Cohen 61 8 9386 9888 [ronnie@uropath.com.au](mailto:ronnie@uropath.com.au)

Berlin, Germany: Professor Dr. Med. Helmut Bonkhoff, Pathology Laboratories, Großbeerenstrasse 12, D-12209, Berlin, Germany; Telephone +49-30-8431-7882, Email: [info@prostapath.de](mailto:info@prostapath.de), website: [www.prostapath.de](http://www.prostapath.de). Medical Oncologist Stephen Strum highly recommends this pathologist because of his special expertise. It is unlikely insurance from other than Germany will cover the cost. His pathology report includes Ploidy analysis. For additional cost or as a separate pathology request, he provides a comprehensive full Immunohistochemistry (IHC) panel that includes 20 immunohistochemical markers to predict relapse and tumor progression (prognostic factors), and other markers predicting response or resistance to a specific therapy. Further information on these markers can be found on his website as can the appropriate form to be provided your local laboratory requesting the biopsy tissue samples be sent to Dr. Bonkhoff. Cost for his services can be determined by contacting Dr. Bonkhoff as the email address above. He accepts payment either by PayPal or check, and only after the pathology report is complete.
